How the Cessna Got Through the Gate

ORM: Occasional Risk Mismanagement

Seems a guy rented a plane for a show

Small problem: Wings are too wide

Possible actions:

- Get a higher trailer
- Raise aircraft on current trailer
- Remove fence and gate
- Jack up the rear end of the trailer

Upsy-daisy: Expediency Wins

Front-end loader to the rescue

OK, everyone, full speed ahead. Oops!

Rats—seemed like such a good idea

Will the owner will notice?

- Thanks to AD2 David McGee
